WHY FRENCH?

1 Easier to Learn.

As a Romance language, French is easier and faster for English-speakers to master in comparison to other influential world languages like Chinese, German, or Arabic. Given its linguistic and historic connections, learning French also improves students' mastery of both Spanish and Portuguese.

2 Academic Advantage.

A high level of French adds a distinct edge to college applications and furthers college studies. French can help qualified high-school students earn advanced standing or college credits in national examinations. With French, students can more easily excel in study abroad programs and university exchanges—not to mention, have a competitive advantage in degree programs in multiple disciplines, from International Relations to the humanities.

3 Professional Opportunities.

As one of the main languages of business and international relations, French opens new opportunities for employment with French and international companies in India, 32 countries where French is an official language, or abroad.

4 International Education.

A mastery of French provides opportunity to study in the widely respected yet competitively priced French university system (including prestigious institutions like the Sorbonne) as well as top universities in other Francophone countries.

5 Global Perspectives.

With over 270 million speakers around the world, knowing French fosters regional and international connections. Besides being spoken in Europe, the Americas, the Caribbean, and Africa, French is an official language of the United Nations, the European Union, and major international organizations like the International Red Cross, the International Olympic Committee, and Doctors Without Borders.
